ABOUT CLUNO

Our vision is **DRIVING – AS SIMPLE AS LISTENING TO MUSIC.**

Cluno is a new, flexible mobility concept suitable for anyone who enjoys the freedom of a car without having the hassle of really owning one. Cluno customers merely book their vehicle online or via app and pay a fixed monthly package price, in which all costs except refueling are included. After six months customers can change to another car, pause or end the use at any time. The new mobility concept is unique in Europe. The Munich-based company was founded in 2017 by Christina Polleti, Nico Polleti, and Andreas Schuierer. Cluno is funded by leading venture capital funds Acton Capital Partners and Atlantic Labs.
